

HELLO EDINBURGH GUINEA PIGS

5G / 20 Minute Neighbourhoods are coming, like it or not ?

Will you still trust your local / national leaders when you discover what they have already installed and plan to do in your community, without your lawful consent or knowledge and with your money?

Don't fear, you can resist lies and liars to save your community !

◆ EDINBURGH ◆

THE CITY OF EDINBURGH COUNCIL
YOUR CITY - YOUR COUNCIL - YOUR LIARS

The 554,000 residents of Edinburgh are being made into guinea pigs

You are to live in an imposed scheme known as 20 Minute Neighbourhoods (20MNs). This may sound necessary or convenient, but it's not. It is to be surveilled, controlled living, restricting you from driving freely around your city connected to many other new impositions. You will need to register your vehicle (only one per family) to seek permission for your quota of 100 days a year to go where you need, with fines if you travel outside those days or certain times. *Did you agree to these huge impositions?*

The promotional cartoon below represents all the consultation you are getting. This imposition is happening whether you like it or not, decided by assumed authority over you, justified by emergency powers to fight 'The Climate Crisis'. This is a lot to take in and cannot be abbreviated, or you may not be able to see the scale of the agenda.

20MNs are managed by a 5G infrastructure you never asked for or agreed to, at vast public expense, arguably not needed, using energy of over 70 homes for some base stations; a wasteful outrage! Justifying 5G /20MNs and other linked initiatives 'to fight climate change emergency', is clearly a **LIE**. While vast funds and electricity is wasted on harmful technology, not wanted or needed, you make sacrifices, cut usage, accept higher costs / scarcity of money and compact your life. As the climate lie fails, false justification for all of the above is shifting towards 'quality of life' and 'safety'.

13,000
5G Base
Stations

The 15 Minute City is a UN and WEF plan, because they care about you want you to drive less.

A cartoon from the WEF just for you good girls and boys:

Edinburgh surveillance network may use more power than its 280k homes
Base stations, antennas, cameras, added devices, repairs, data harvesting / storage etc.

At £50k+ all costs
ea. x 50 per km²
= 13,000 units to
cover Edinburgh,
some using the
power of over 70
average homes!

**To Help
Climate Change!**

Your local leaders have a wonderful new life planned for you!

Wave goodbye to impromptu pub lunches by the river, popping over to see an elderly parent in a care home or spontaneous surprise visits to a sick friend to offer to walk their dog. No more spur of the moment lifts in the rain to drop someone home. Each journey will be restricted unless you have enough “credits” with the latest allowances.

You don't need to be a genius to see where this is going. Of course, the problem will likely get worse. The 100 days could be cut to 50 then 25 and then zero. The fines could get bigger until one day you just give up on owning a car which is what they want. ***How can this be possible, they must have planned this for years, you may ask?***

Is this what you want for your children, community and future?

There is a lot to digest in this booklet with further study needed, to appreciate issues, risks and implications of 5G / 20MNs and what it leads to for your life and health. There is an urgency for us as a community to learn and act now or it may be too late for you, your children and your future. Your local leaders are not waiting for your approval **SO ACT NOW!**

What can you do about this coming, permanent imposition?

You may think; I'll write to my Edinburgh City leaders or Councillors, they'll be rightly outraged and get involved. Sadly they signed off on this proposal and its funding on your behalf perhaps many years ago, and now have limited power like you to change it. They know you have not been properly consulted and this is only part of bigger plans to be imposed upon you. The Mayor may not be a willing ally in this either, nor any employees of your City or County Council, who are part of the roll out. However, with enough concerted effort of Edinburgh residents asking reasonable questions the error of their judgements and indoctrinations may be dawned upon them, by us. We must have faith that they can come to their senses. If enough local people can appeal reasonably to leaders, they could yet be our allies, though some may eventually have to face discipline and consequences for their dereliction of duty in public office.

Some local leaders may come to realise they have been duped into risking harm upon their own community, convinced it was for the good of the people and environment. They have failed as our employees, to protect and serve our interests, to question or resist these impositions instead of just helping them happen. They are knowingly and dangerously acting out of our control. Many will need to resign or be removed from office, but they could mitigate lasting stains on their reputation by getting involved in dismantling this outrageous initiative, and all other linked unlawful impositions on us.

What else is planned or being rolled out without your consent?

Sadly, 20MNs is only one of the many connected initiatives that we are expected to trust, to be imposed upon our communities, coming down from on high. We were **NEVER** consulted, agreed to any funding or had any vote upon them. Vast public funds have already installed surveillance infrastructure needed as part of so called SMART city initiatives. Facial and number plate recognition cameras, with 5G connectivity alongside digital ID rollout and digital only 'cashless society', will track and trace your good behaviour. Proposed online behaviour monitoring may, under new 'hate speech' and 'misinformation', rules / laws, criminalise or stop guinea pig debate or resistance to any imposed plans. We mere guinea pigs are expected to just trust all impositions and if we catch on they will change names, try a different tack or censor us.

Scotland to bring in '20-minute neighbourhoods' in net zero push

Liveable Neighbourhoods

Edinburgh moves forward on 20 minute neighbourhoods

29 Nov 2022 — The **20-Minute Neighbourhood** strategy was launched in June 2021. Its vision is to enable a net zero **Edinburgh** where everyone can live well ...

Where is the 20MNs initiative coming from?

This initiative like so many comes from the European Union (EU), United Nations (UN) and the World Economic Forum (WEF) as part of their Agenda 2030 strategy for us, which our leaders signed up to, under insistence, on our behalf. Intimidations of Non Governmental Bodies (NGOs) dictate that the world has multiple crisis needing to be managed, with emergency powers to be approved in all sovereign countries without question or delay. All challenges are quashed, mocked or censored. You cannot and should not question 'climate emergency' or 'Covid19 pandemic' declarations, because that may be considered blasphemy, misinformation or deemed illegal hate speech!

What can happen next or later on, if 5G/ 20MNs are not stopped?

If our national and local leaders abdicate from their oath of office, to no longer serve and protect their community, and with that dereliction of duty, allow unelected and unconsented global body organisation demands to have unfettered and unquestioned access to how we live in our communities, anything is possible. This disempowers our communities, forcing us to live at the whim of global bodies, with whatever agenda and stealthy mission creep they fancy imposing, beyond our control. If you explore you can easily see the published agenda of global bodies who are pushing 5G /20MNs /C40 Cities, all around the world. **Who are we mere guinea pigs to question the ideas of the UN, WEF, WHO, Davos, Bilderberg and others who think they know what's best for us?**

These images from 'Absolute Zero', 'C40 Cities' and 'UK Future Industrial Strategy' reveal real target plans for almost no flights, cars, meat or clothing by 2030, to be enforced upon you.

Table 5

Consumption interventions for private transport and associated targets.

CONSUMPTION INTERVENTION	AMBITIOUS TARGET IN 2030
Reduce ownership	0 private vehicles

Table 3

Consumption interventions for food and associated targets.

CONSUMPTION INTERVENTION	AMBITIOUS TARGET IN 2030
Dietary change (this intervention is characterised by three major changes which are described in more detail)	0 kg meat consumption
	0 kg dairy consumption (milk or derivative equivalent) per person per year

Table 4

Consumption interventions for clothing and textiles and associated targets.

CONSUMPTION INTERVENTION	AMBITIOUS TARGET IN 2030
Reduce number of clothing and textile items	3 new clothing items per person per year

2020-2029

2030-2049

Flying All airports except Heathrow, Glasgow and Belfast close with transfers by rail

All remaining airports close

Are 5G/ 20MNs being resisted in other communities?

Yes, the good news is, you are not alone. Oxford City residents caught on quickly to the implications of this initiative, and have been very active alongside Canterbury, Bristol, Sheffield and others where this is being rolled out over them. While available these 4 QR code link to online protest videos, showing some community action and responses;

What if groceries are cheaper in another neighbourhood, will you be allowed to go there or will each zone be secured as a separate community and economy?

Possible questions are endless, but its the underlying premise we should perhaps focus upon, rather than being drawn into debating the fairest layout of chairs on the Titanic.

This comes from UN Agenda 2030, which moves towards the ultimate aim of getting the majority of people into compact SMART cities where all activity can be monitored and influenced to control people's 'Personal Carbon Allowance' and behaviour.

Confused by volumes, jargon and new invented phrases?

Looking into this initiative, its justifications and context is exhausting, since the detail is buried in vast documents, policies, treaties, deals and white papers. The language is deliberately vague and elusive by design. Dubious new words and terms, with unclear meanings like 'Liveability', offer 'Trojan Horse' type opportunities for later nefarious interpretation. This is a confidence game, with our assumed agreement, giving licence to implement unless we clearly **SAY NO!** The truth is simple but lies are often complex.

Why do we trust big complex initiatives pushed by the usual unelected, paid liars?

Reducing your "carbon footprint" or wastefulness of raw materials seems laudable, but is it that what 20 minute neighbourhoods are really all about?

The various costs of this initiative; exponentially rising power usage / carbon footprint of endless surveillance, 5G technology, maintenance, ongoing operation / personnel, dwarfs any impact of our local volunteered reduction of raw material and energy uses. It is a blatant **LIE** and will not give local people a better life either, that too is a **LIE**, as is the need for more safety. A fraction of 5G/20MNs costs and ongoing overheads could fund many vital local needs and put more caring loyal police on the streets to protect and serve their community. Talk this through with friends and neighbours, especially those who work in construction or technology, and you will easily see the lies of this imposition, which is about controlling people. If it was for our good, they would not have had to prepare and implement this agenda in secrecy and then impose it upon us.

Will Edinburgh communities have to lead their own resistance?

Who will lead or help Edinburgh communities investigate or resist this initiative, with more impositions to come, using expensive infrastructure to surveil your compliance?

Though people in many communities are waking up to this initiative, they must focus their efforts on their own community if they are to expose and stop this fraud. Your voice is of course most valid in your own community with your own leaders, who know their actual role is to serve you and your interests. This booklet is designed to serve the Edinburgh community though it builds upon work and memes used elsewhere, in what is a national if not global struggle, against tyrannical ambitions over all of us.

Anyone still trusting leaders pushing, justifying or making excuses for this initiative may be in for a shock. Anyone trusting 20MNs is/will only ever be, a limited restriction like “3 weeks to flatten the curve”, (The Covid measures assurance promise), from 3 years ago, has not looked adequately at the evidence, context and hostile agenda.

Can we make our local leaders see the light, or feel the heat of our demands?

What would you like local leaders to spend your money on?

If you can have dialogue with local leaders you may want to let them know if you are unhappy they have spent your money bringing forward this initiative and associated infrastructure, at vast expense. You may want to suggest how you would like them to spend your money and rightly expect due consideration. Don't let coercion and fear become normal parts of daily life with this 20 Minute Neighbourhood plan and more.

If you're worried about this future, like many people, you might consider running for local office or getting involved in your own community council to be heard and be more influential. Rather than feeling there is nothing you could possibly do to make any difference, try getting involved. Oxford with a population of 150,000 mobilised enough concerned locals to cause a big stir, imagine what Edinburgh could bring with a share of 540,000 people. We have to start somewhere. Hopefully this booklet will help. Consider sharing something on social media, attending local meetings or leafleting in your community. Use this booklet, it is yours. This is really so important!

MAKING A STAND doesn't have to be heroic, just reject the future being imposed on your family and community, and help each other work towards shaping a better one.

Good luck in your efforts, make your family proud and **Oh, don't be a guinea pig!**

**Speak Out
Now!**

What can you do about this and other imposed initiatives?

Study this booklet, the links and related information to know the facts and questions. Share this booklet with others in your community, pursue peaceful, lawful resistance. It is then up to individuals to make their views known, so here is a relevant list of 17 contacts you could email as a group, to perhaps pose these reasonable 4 questions;

1. Where has the 20MNs proposal come from, who is funding it, can you show me the local public consent mandate for this initiative, funding, action and installations?
2. What would end this proposal permanently if the people of Edinburgh do not want it, and if it cannot be stopped, how is that lawful?
3. Do you believe in the principles of free movement, free speech and sovereign human rights over unconsented governance?
4. If you cant confirm your belief in basic human rights, we have a serious problem, and if you can, how can you then promote an initiative, funded and developed in secret, over many years, imposed or only presented for consultation at a near completion stage, that impacts our inalienable rights, which is a criminal fraud?

Answers to such questions, if pushed, may be dealt with by legal teams using careful, seemingly reasonable language. They may try to diffuse any pressure to stop such initiatives, because they are secretly done deals. **NOT FOR DEBATE!** You may start to recognise hidden agendas and discover hidden fences for your containment which are well reinforced and defended against any investigation or challenge you or your community may present. **We are truly on the edge of a precipice! JUST SAY NO!**
